Please do not grant permit for Buckingham Compressor Station1 message

Amanda Alger <amanda_alger@hotmail.com>

Wed, Sep 12, 2018 at 1:46 PM

To: "airdivision1@deq.virginia.gov" <airdivision1@deq.virginia.gov>

I am writing asking the DEQ to not grant an air emissions permit for the Buckingham Compressor Station.

I am concerned that this location has been picked because it is an historically black, low income area with little resources to fight an unhealthy situation.

Please do what is right for these residents and say no to this permit.

Hello,

Make it easier to comment!!!! Make it user-friendly, well-designed, so that the public, those you are trying to serve, can actually participate in the processes that are supposed to be democratic. I suggest having a button and form that automatically emails you all!

From,
A Concerned Citizen Against the Atlantic Coast Pipeline

1702 Fairview Avenue
703-328-5648

THIS IS SO MUCH TEXT. It should be SIMPLE.

[How to Comment](#)

DEQ accepts comments by hand-delivery, e-mail, fax or postal mail. All comments and requests must be in writing and be received by DEQ during the comment period. Submittals must include the names, mailing addresses and telephone numbers of the commenter/requester and of all persons represented by the commenter/requester. The Director of DEQ has determined that the permit will go before the Board in accordance with 9 VAC 5-80-25 F.

Contact for public comments, document requests and additional information: Ann Regn; Phone: (804) 698-4442; Postal Mail: Piedmont Regional Office, RE: Buckingham Compressor Station, 4949-A Cox Rd, Glen Allen, VA 23060; E-mail: airdivision1@deq.virginia.gov; Fax: (804) 527-5106. The public may review the draft permit and application at the DEQ office named above or may request copies of the documents from the contact person listed above.

Dear Virginia Department of Environment Quality,

I write to ask you to not go forward with the proposed 54,000-horsepower compressor station in the historic African-American community of Buckingham.

I say this out of two imperatives: the need to prioritize the preservation of historically meaningful places in the Commonwealth of Virginia, and the need to not do harm to the health, safety, and well-being of residents of a long-lived community.

Not only Buckingham people, but Virginia residents well outside this area are questioning why Dominion Energy has chosen to place this potentially dangerous facility so close to these poor people's homes.

If the compressor station results in health and safety problems for these residents, where will they go, who can they turn to for reparations?

This is a predominantly low-income area - how will residents have the financial resources to defend themselves if something goes wrong? If their homes become uninhabitable, it is not as though they can simply sell their residence and pick up and move - they could be trapped without a place to go and suffer the health and financial consequences they don't deserve.

My understanding is that it would be the only compressor station in the state. My suspicions are aroused that Dominion chose to pick a vulnerable place like Buckingham. Why does Dominion need to build there? What is the necessity for this particular project in this particular place?

I think the Department of Environmental Quality should consider that no residential community in the state would want this compressor station in their backyard - so why is it permissible to place it in an African-American location of deep personal significance to the families that have stayed there, generation after generation?

If the Department of Environmental Quality sees no issue with this Dominion plan, the government agency needs to explain not only to Buckingham, but to all Virginians, why this project is legal, fair and justified.

It seems that the question before you is whether the Department of Environmental Quality will side with private gain versus public good. I ask the Department of Environmental Quality to side with the public in this matter.

Sincerely,
Abby Fox

Dear Ms:

I'm writing today to urge the Air Pollution Control Board to reject the proposed permit for Dominion Energy's Buckingham Compressor Station.

This facility is a threat to our climate, public health and public safety, and the Board has an obligation to protect Virginians' clean air at all costs.

A vote to allow operation of this facility is a vote to expose residents of Union Hill to nearly 140 tons per year of harmful chemical emissions; it is a vote to increase climate disrupting greenhouse gas emissions at a time when Virginia is moving to decrease climate impacts from the power sector; and it is a vote to put Buckingham County in a blast zone.

Virginia doesn't need the Atlantic Coast Pipeline and we don't need this compressor station. I urge the Board to deny this and any future permits that come before you.

Sincerely,

Colleen Garrison

The concept of “tzedek” comes from the Jewish faith tradition, calling for justice and equity among all people. The vision of tzedek is one of environmental justice and clean and safe air for all to breathe. The proposed Atlantic Coast Pipeline (ACP) compressor station violates this concept as it would expose residents in Union Hill and Buckingham County to leaking pollutants such as methane gas, formaldehyde, benzene, arsenic, uranium and additional toxic volatile organic compounds (VOCs).

This 54,000+ horsepower compressor station is one of the largest that Dominion has ever built and the largest in Virginia, further endangering health of residents and increasing risk and vulnerability. Having clean air is a fundamental human right and is especially vital for children and the elderly, some of the most vulnerable to the negative impacts of inhaling pollutants.

Many of the world’s major faith traditions have a mandate to care for the Earth. By doing so, we care for each other. I submit this comment with love to express my solidarity with the community of Buckingham and their health and safety concerns stemming from the construction and operation of this massive compressor station.

I urge the VA State Air Pollution Control Board and the Department of Environmental Quality (DEQ) to extend the 30-day comment period to at least 60 days, to ensure meaningful participation by impacted populations in permitting and monitoring, and to immediately complete a thorough Quantitative Risk Assessment (QRA) and a Comprehensive Health Impact Assessment (CHIA) prior to any future permitting.

I further urge the VA State Air Pollution Control Board and the DEQ to abide by the principles of environmental justice as the compressor station is proposed to be sited in Buckingham County’s historic Union Hill, an 85% African American community. It is unacceptable that our society continues to disproportionately burden the poor and people of color with increased levels of dangerous air pollution.

Being unable to take a deep breath of clean air to pray or meditate at the many nearby religious sites such as Union Hill and Union Grove Churches and the LOTUS Temple, one of the many sacred places in Satchidananda Ashram Yogaville, is an egregious violation of humanity.

The risks to our sacred gift of air posed by Dominion’s proposed ACP compressor station are simply too high.

The ACP: Safe for Buckingham County

1 message

paul kelly <paul.kelly.41228878@p2a.co>
Reply-To: ibpdkelly@gmail.com
To: Ann Regn <airdivision1@deq.virginia.gov>

Wed, Sep 12, 2018 at 9:09 AM

Dear Director Ann Regn,

The Atlantic Coast Pipeline team has shown considerable responsibility in its plans for the Buckingham County Compressor Station. Although state and federal laws and regulations classify the station as a “minor” source of emissions, the ACP team has agreed to limits and control technologies that are typically required for operations with much higher levels of emissions. In fact, the Virginia Department of Environmental Quality draft air quality permit for the facility contains the most stringent emissions limits imposed on any minor or major natural gas compressor stations in the state.

The station and its operations are designed to drastically minimize emissions, making it safe for our community. Modeling has demonstrated that any emissions will be well below federal and state standards designed to protect human health. Even though these standards are not typically applied to “minor” sources of emissions like the compressor station, they will be met—and surpassed—by the Buckingham facility.

Thanks to the exhaustive review, the Atlantic Coast Pipeline is a safe, environmentally responsible pipeline project. And Virginia greatly needs the affordable natural gas it will bring to our region. Please do not stand in the way of the huge economic benefit it could have for our communities.

Regards,
paul kelly

Reply-To: kou.utk@gmail.com

To: Ann Regn <airdivision1@deq.virginia.gov>

Dear Director Ann Regn,

Doing the right thing for our communities, our economy, and our environment is a balancing act. That's why a project as important as the Atlantic Coast Pipeline isn't built overnight. Rather, this project has gone through more than three years of careful planning and thorough scrutiny from agencies and organizations at every level.

Because of that exhaustive planning, the ACP is the safest way for us to get affordable, cleaner natural gas to those in our region who desperately need it.

The Buckingham Compressor Station is an integral part of the ACP project. The compressor station's "best in class" engineering design, and advanced emissions control equipment will ensure the facility will fully protect Virginia's air quality. In fact, modeling has demonstrated that the station's emissions, even when the facility is operating at its maximum, will not adversely impact Virginia's air quality. The modeling was conducted using methods approved by DEQ and has proven reliable thus far.

I believe that the stringency of the air quality permit that the ACP project has already passed will keep our community safe—while still allowing us to move forward with producing cleaner and more affordable American energy.

Accordingly, in the case of the recent discussions by the State Water Control Board regarding the state's use of the Army Corps of Engineers Nationwide Permit 12, I believe revisiting the existing process would be a mistake.

Our state's environment and our business climate have prospered from a consistent, predictable regulatory climate and from federal and state partnerships to allow scarce regulatory resources to be put to optimal use. There is no need to change the current approach.

Sincerely,
Derek Kou

As a resident of adjoining Fluvanna County and a frequent visitor to Buckingham, I am opposed to the granting of this permit.

I am alarmed that according to knowledgeable and expert opponents to the BCS, there are 106 unanswered questions about its safety!

The one that most jumps to the forefront to me is that Dominion Energy has presented an inaccurate undercount of the population of the Union Hill community. This is stunning. Dominion is willing to spend millions to sway public opinion by feel-good commercials but won't spend a few thousand for a proper census to determine realistically how many people would be impacted?

Instead Dominion Power says "trust us." Trust it when the effects of likely toxic emissions would be devastating to children, the infirm and elderly - the very face of marginalized people living in rural poverty?

Trust it when the bones of the enslaved who made Virginia the rich and vibrant (mostly) state it is today face cold impersonal violation?

Trust it when the tattered remnants of their descendants live powerless against a monolith with its towering pile of redeemable political chips?

Trust it when some of those chips were and surely will be again used to prevent "over-earnings" from being returned to their rightful owners, the customers?

Trust it when the very premise of the pipeline, negatively impacting hundreds of private landowners by eminent domain seizures, is based on the lie that fracked gas - the stuff of earthquakes, contamination and/or depletion of priceless groundwater, desecration of the pristine Blue Ridge and foothills, danger to if not death of developing fetuses, detrimental effect of the very climate, and on and on and on - is needed for U.S energy independence instead of the truth that it is to be sold to foreign markets to further bloat Dominion's profits?

No. Instead we have to trust you to do the right thing and deny this permit.

Dear person monitoring this email account,

Not sure where to send comments and concerns regarding the Buckingham compressor station for the ACP, but I trust you will forward to the appropriate person.

I'm deeply concerned about the direction our country is taking in general in building so many pipelines and developing so much fracking with so little control and oversight. I realize regulatory agencies have had budgets cut and are led by people with little concern for the environment. I do know from working with the DEQ staff on the ground in specific incidences that often those who work more closely with actual investigation and direct regulation do have concerns for our environment and with supporting the mission of the DEQ.

I ask those of you who care to make the effort to slow this monster down. The Buckingham station is going to affect so many people who don't have a powerful voice. These pipelines criss-crossing our beautiful landscape are a threat to water, land, homes, and people. Please do what you can to stop or move this station to a better location. I don't know enough specific facts to write a iron-clad argument, but I know enough to realize that human-made systems are inherently flawed and breakable, and we have enough evidence to know a pipeline of this size is risky. Please do what you can to slow down the process. Make Dominion energy do the work they need to do to ensure minimal impact.

I appreciate your efforts,

Melissa Luce

RE: Buckingham Compressor Station

Dear Department of Environmental Quality:

Thank you for the opportunity to offer my comments on the draft air permit for the Atlantic Coast Pipeline's Buckingham Compressor Station. As a resident of the Commonwealth, I have strongly backed the pipeline and believe it is one of the foundations of a more secure and reliable energy future for Virginia. However, I could not support the project if I believed that the pipeline or any of its associated facilities, including the compressor station, would harm our state's environment. Fortunately I have no such concerns. I am confident in the project developers' commitment to protecting our natural resources and I am equally confident in DEQ's ability to oversee and regulate the ACP's environmental aspects. Your draft air quality permit for the Buckingham Compressor Station provides me with even more confidence in the project.

I am very impressed by the emissions limits and control technology incorporated in the draft permit. Although the station is classified as a "minor" source, the permit requirements are similar to those typically imposed on facilities with much higher levels of emissions. In fact, I understand that the limits imposed by the draft permit are four to 10 times more stringent than the limits in other recently issued for compressor stations in the Commonwealth. This is the case for a variety of regulated emissions, including nitrogen oxides, carbon monoxide and volatile organic compounds.

The technology requirements incorporated in the draft permit are equally impressive. These requirements include selective catalytic reduction for controlling emissions of nitrogen oxides and systems to reduce the venting of natural gas into the atmosphere. Here again, I believe the standards imposed on this "minor" source are much more typical of requirements for the operation of larger facilities with higher levels of emissions.

The Department of Environmental Quality has a proven track record, spanning many years, of protecting the Commonwealth's natural resources, including its air quality. You have brought that same level of dedication to the development of the draft air permit for the Buckingham Compressor Station. I believe Virginia must move forward toward a more secure and reliable energy future and that the ACP is a key to that move. But I also believe we must take strong steps to safeguard the environment as we build that more secure future. The draft permit for the compressor station is one of those strong steps, and I commend you for it. Thank you again for the opportunity to present my comments to you.

Sincerely,

Dear Ms:

I'm writing today to urge the Air Pollution Control Board to reject the proposed permit for Dominion Energy's Buckingham Compressor Station.

This facility is a threat to our climate, public health and public safety, and the Board has an obligation to protect Virginians' clean air at all costs.

A vote to allow operation of this facility is a vote to expose residents of Union Hill to nearly 140 tons per year of harmful chemical emissions; it is a vote to increase climate disrupting greenhouse gas emissions at a time when Virginia is moving to decrease climate impacts from the power sector; and it is a vote to put Buckingham County in a blast zone.

Virginia doesn't need the Atlantic Coast Pipeline and we don't need this compressor station. I urge the Board to deny this and any future permits that come before you.

Sincerely,

Patricia Rowell
1520 Grassymeade Lane
Alexandria, VA 22308-1840

Attention: Virginia Department of Environmental Quality

Piedmont Regional Office

[4949-A Cox Road](#)

[Glen Allen, VA 23060](#)

RE: Buckingham Compressor Station

Dear Department of Environmental Quality:

Thank you for the opportunity to offer my comments on the draft air permit for the Atlantic Coast Pipeline's Buckingham Compressor Station. As a resident of the Commonwealth, I have strongly backed the pipeline and believe it is one of the foundations of a more secure and reliable energy future for Virginia. However, I could not support the project if I believed that the pipeline or any of its associated facilities, including the compressor station, would harm our state's environment. Fortunately I have no such concerns. I am confident in the project developers' commitment to protecting our natural resources and I am equally confident in DEQ's ability to oversee and regulate the ACP's environmental aspects. Your draft air quality permit for the Buckingham Compressor Station provides me with even more confidence in the project.

I am very impressed by the emissions limits and control technology incorporated in the draft permit. Although the station is classified as a "minor" source, the permit requirements are similar to those typically imposed on facilities with much higher levels of emissions. In fact, I understand that the limits imposed by the draft permit are four to 10 times more stringent than the limits in other recently issued for compressor stations in the Commonwealth. This is the case for a variety of regulated emissions, including nitrogen oxides, carbon monoxide and volatile organic compounds.

The technology requirements incorporated in the draft permit are equally impressive. These requirements include selective catalytic reduction for controlling emissions of nitrogen oxides and systems to reduce the venting of natural gas into the atmosphere. Here again, I believe the standards imposed on this "minor" source are much more typical of requirements for the operation of larger facilities with higher levels of emissions.

The Department of Environmental Quality has a proven track record, spanning many years, of protecting the Commonwealth's natural resources, including its air quality. You have brought that same level of dedication to the development of the draft air permit for the Buckingham Compressor Station. I believe Virginia must move forward toward a more secure and reliable energy future and that the ACP is a key to that move. But I also believe we must take strong steps to safeguard the environment as we build that more secure future. The draft permit for the compressor station is one of those strong steps, and I commend you for it. Thank you again for the opportunity to present my comments to you.

Sincerely,

10/1/2018

I'm writing today to urge the Air Pollution Control Board to reject the proposed permit for Dominion Energy's Buckingham Compressor Station.

This facility is a threat to our climate, public health and public safety, and the Board has an obligation to protect Virginians' clean air at all costs.

A vote to allow operation of this facility is a vote to expose residents of Union Hill to nearly 140 tons per year of harmful chemical emissions; it is a vote to increase climate disrupting greenhouse gas emissions at a time when Virginia is moving to decrease climate impacts from the power sector; and it is a vote to put Buckingham County in a blast zone.

Virginia doesn't need the Atlantic Coast Pipeline and we don't need this compressor station. I urge the Board to deny this and any future permits that come before you.

Sincerely,

Susanne Gaon
5108 Woodmere Drive, Unit 102
Centreville, VA 20120

Dear Ms:

I'm writing today to urge the Air Pollution Control Board to reject the proposed permit for Dominion Energy's Buckingham Compressor Station.

This facility is a threat to our climate, public health and public safety. The Air Pollution Control Board has an obligation to protect Virginians' clean air at all costs. A vote to allow operation of this facility is a vote to expose residents of the Union Hill community to nearly 140 tons per year of harmful chemical emissions such as sulfur dioxide, carbon monoxide, and nitrogen oxides that can cause nosebleeds and eye/throat irritation; it is a vote to increase climate disrupting greenhouse gas emissions at a time when Virginia is moving to decrease climate impacts from the power sector; and it is a vote to put Buckingham County in a blast zone.

Virginia doesn't need the Atlantic Coast Pipeline and we don't need this compressor station. I urge the Board to deny this and any future permits that come before you.

Dear Ms:

I'm writing today to urge the Air Pollution Control Board to reject the proposed permit for Dominion Energy's Buckingham Compressor Station.

This facility is a threat to our climate, public health and public safety, and the Board has an obligation to protect Virginians' clean air at all costs.

A vote to allow operation of this facility is a vote to expose residents of Union Hill to nearly 140 tons per year of harmful chemical emissions; it is a vote to increase climate disrupting greenhouse gas emissions at a time when Virginia is moving to decrease climate impacts from the power sector; and it is a vote to put Buckingham County in a blast zone.

Virginia doesn't need the Atlantic Coast Pipeline and we don't need this compressor station. I urge the Board to deny this and any future permits that come before you.

Sincerely,

Crystal Polk
9220 Sprucewood Road
Burke, VA 22015-3557
